

In The Claims:

1. (currently amended) A decorative laminate comprising:
 - a substrate layer ~~comprising~~ consisting essentially of a woven fiber material;
 - an embossable layer disposed upon said substrate layer, said embossable layer comprising a ~~non-foam~~ pigmented embossable resin; and
 - a protective layer comprising a polyvinyl fluoride-based material positioned adjacent said embossable layer.
2. (original) The decorative laminate of Claim 1, further comprising an ink layer between said embossable layer and said protective layer.
3. (original) The decorative laminate of Claim 2, wherein the ink layer has a plurality of colors and the embossable resin has a pigmentation of one of the plurality of colors.
4. (original) The decorative laminate of Claim 2, wherein the ink layer has a predominant color and the embossable resin has a pigmentation of the same predominant color.
5. (original) The decorative laminate of Claim 1, wherein the substrate layer comprises fibers selected from the group consisting of glass, aramid, carbon, and Kevlar.
6. (original) The decorative laminate of Claim 1, wherein the embossable layer has a thickness between about 2 mil and about 8 mil.
7. (original) The decorative laminate of Claim 6, wherein the embossable layer has a thickness between about 4 mil and about 6 mil.

8. (original) The decorative laminate of Claim 1, wherein the protective layer has a thickness between about 0.2 mil and about 1.5 mil.

9. (original) The decorative laminate of Claim 8, wherein the protective layer has a thickness between about 0.5 mil and about 0.9 mil.

10. (previously presented) The decorative laminate of Claim 1, wherein the embossable resin is selected from the group consisting of epoxies, polyesters, phenols, and combination thereof.

11. (canceled)

12. (original) The decorative laminate of Claim 1, wherein the polyvinyl fluoride-based material is selected from the group consisting of polyvinyl fluoride and polyvinylidene fluoride.

13. (canceled)

14. (canceled)

15. (canceled)

16. (canceled)

17. (currently amended) A decorative laminate comprising:
a substrate layer consisting essentially of a woven fiber material;
an embossable layer comprised of a pigmented embossable resin disposed upon
said substrate layer;

an at least partially transparent protective layer disposed upon said embossable layer; and

an ink layer disposed between said embossable layer and said protective layer, wherein the pigmentation of said embossable layer has a color that matches at least one color of the ink layer.

18. (original) The decorative laminate of Claim 17, wherein the ink layer has a predominate color and the pigmentation of the embossable layer is the same as the predominate color of the ink layer.

19. (cancelled)

20. (original) The decorative laminate of Claim 17, wherein the protective layer comprises a polyvinyl fluoride-based material.

21. (original) The decorative laminate of Claim 17, wherein the woven fiber material ~~substrate layer~~ comprises fibers selected from the group consisting of glass, aramid, carbon, and Kevlar.

22. (original) The decorative laminate of Claim 17, wherein the embossable resin is selected from the group consisting of polyurethanes, epoxies, polyesters, phenols, and combination thereof.

23. (cancelled)

24. (original) The decorative laminate of Claim 17, wherein the polyvinyl fluoride-based material is selected from the group consisting of polyvinyl fluoride and polyvinylidene fluoride.
